

Serial No. 10/804,970

**IN THE ABSTRACT**

Page 6, lines 2-9 have been amended as follows:

A tool-carrying device includes a toolbox with corners and armors each embedded in corresponding one of the corners. The toolbox includes ~~comprises~~ a recess defined in each of the corners in order to receive a corresponding one of the armors. Each of the corners includes a plurality of holes located within the recess thereof. Each of the armors includes a plurality of holes. A screw can be driven to each of the holes of the corners through a corresponding one of the holes of the armors in order to secure the armors to the corners.
